

## Scared of Tornadoes Process

The way that I made Scared of Tornadoes is first I went to Paint. Then I went to the circle tool and made a circle for the head. Next, I got the wavy line tool and made her hair. Then I made her body with the straight line and curvy line. Next I used to the straight line and made the grass. So, after I did the ground I colored in the ground with a brownish green and light green for the grass. Then I colored in the sky with a gray blue color. Next, I colored in her clothes, hair, and her skin. After that, I made clouds in the sky with lightning coming out of the clouds. Then I colored in the clouds with a gray and colored the lightning with a bright yellow. Next, I made the tornado by getting the spray tool and getting different colors to make the tornado look like an actual tornado. Then I made ground come up from where the tornado was coming towards the girl. After I made the tornado, I made her face and eyes. Then I made her mouth looked surprised and she was scared. After I did that, I shaded and highlighted the picture. After I shaded and highlighted it I got a light blue and did raindrops. This is the process that helped me create the picture Scared of Tornadoes.
