

The Light in the Attic

When I made The Light in the Attic my first step was to get my Blu phone. Next I walked outside when it was dark. The third thing I did was turn on the porch light. The fourth step I took was to take the picture and emailed it to my teacher. The fifth step I took was to get on files and choose the picture I'd like to enter in the contest. The sixth step I took was to get on Google and search up Scary Light Quotes. Then I looked through my options and found a quote wrote by Shel Silverstein. Next I went to Paint and typed in white letters the quote. Next I started to write my process. These are the nine steps of how I made The Light in the Attic.
